

BETA SIGMA ALPHA MATTE

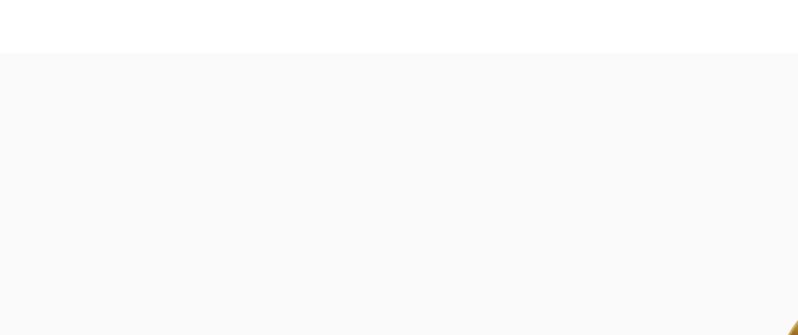

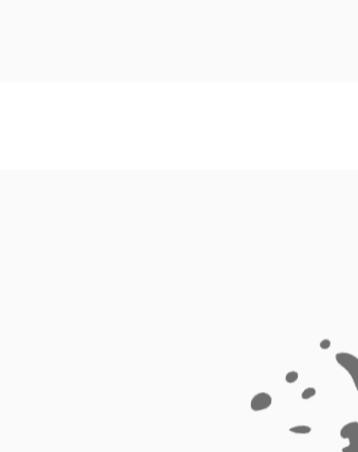

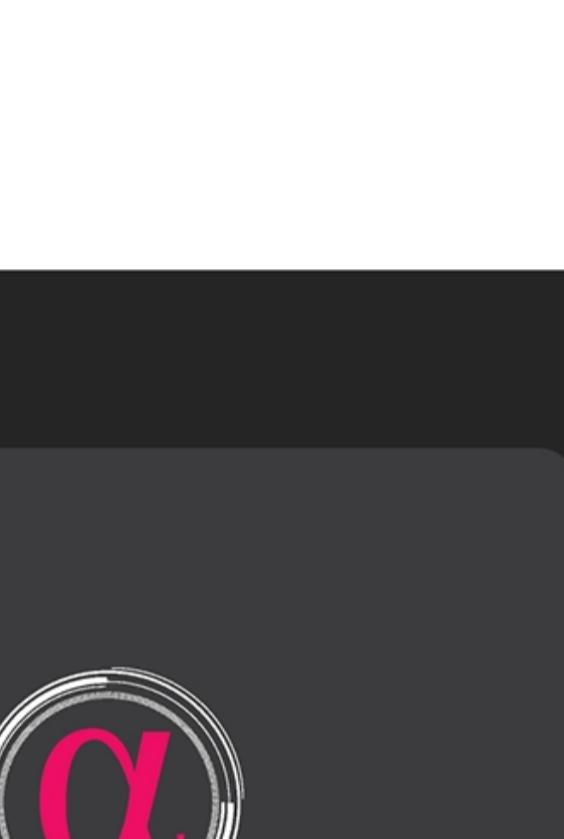

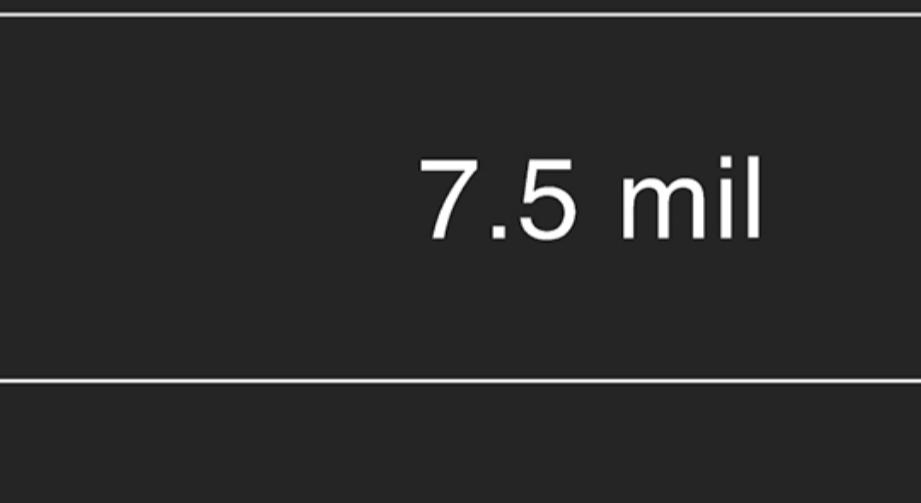

The Project 3 ALPHA

ALPHA is a malleable paint protection film with exceptional tensile strength, making it a prime candidate for the protection of surfaces featuring exaggerated curves and non-traditional designs. Its high-gloss surface adds to the luster of the underlying paint, while the TPU film itself lends high-clarity and lasting protection. Due to its 7.5mil thickness, this material provides exceptional durability and superior resistance to scratches, chips, and various environmental hazards.

Key Features

| | |
|---|--|
|  <p>Enhanced Thickness</p> <p>ALPHA boasts a thicker construction compared to other films in the market, providing exceptional durability and resistance against scratches, chips, and other environmental hazards. This makes it ideal for vehicles that face demanding environments and need maximum defense.</p> |  <p>Self-Healing Technology</p> <p>Minor scratches and swirl marks on the film surface disappear with the application of heat, ensuring your vehicle maintains the film's clarity and smooth finish over time.</p> |
|  <p>Non-Yellowing</p> <p>Engineered to resist yellowing and discoloration from UV exposure, ALPHA ensures your vehicle remains aesthetically pleasing over time.</p> |  <p>Edge Seal Technology</p> <p>This feature prevents the film from lifting and delaminating, providing consistent protection across all edges and surfaces.</p> |
|  <p>Premium Positioning</p> <p>The ALPHA series is targeted at customers who seek the highest level of protection and aesthetic enhancement. It is the perfect choice for luxury vehicles and owners who want to ensure their investment is well-protected and visually stunning.</p> |  <p>Stain Resistance</p> <p>The film's advanced formulation prevents stains from bird droppings, tree sap, and road grime, maintaining clarity and cleanliness.</p> |
